

Test Result Report: Глючный калькулятор  
CREATED BY: Kirill, Aksana  
REPORTED PERIOD: 15.06.2023 - 18.06.2023  
SIGNED OF BY: Vladislav

## TESTING TEAM

Role	Employee
TestLead, Tester	Kirill
Tester	Aksana

## TESTING PROCEDURE DESCRIPTION

The Glitch Calculator app was tested under Windows 10.

The Smoak test was performed manually according to the "tests for manual testing" document.

The critical path test and the extended test were manually performed as per the "tests for manual testing" document.

The black box method was used to test the application and exploratory testing was also used.

Testing was performed on the entire Glitchy Calculator app system.

## SUMMARY

During and as a result of testing of the "Glitch Calculator" application, inconsistencies and critical bugs were identified that contradict the requirements for user use of this application.

During the process, 23 bugs/inconsistencies were detected

Discovered:

1. **10/23** errors were detected
2. **10/23** bugs in priority above average
3. **3/23** minor comments out of 23 identified.

Tested build of [15.06.2023](#)

### TESTING TIMETABLE

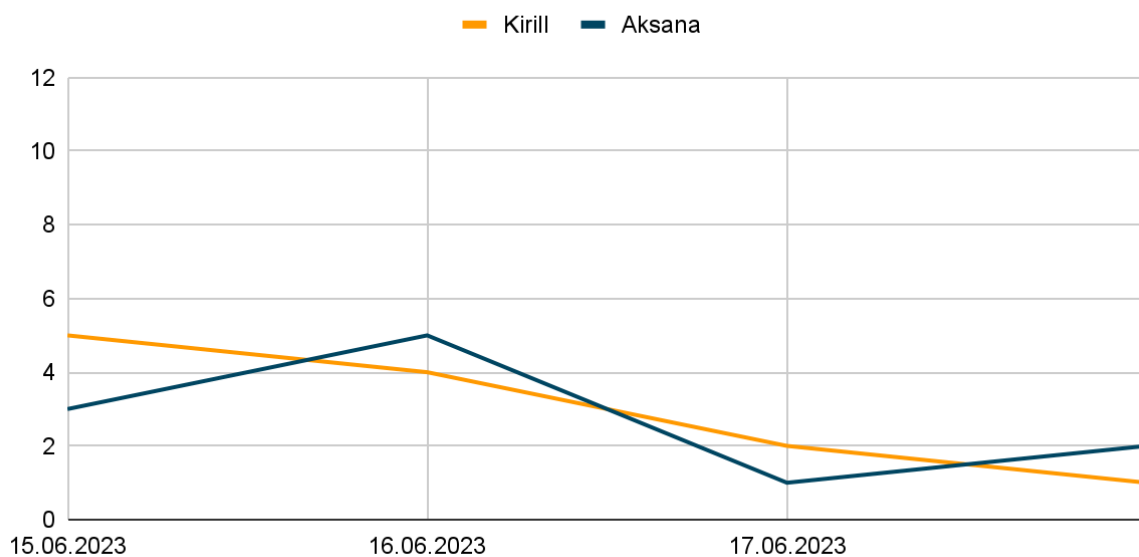

Name of tester	Working time	Work done
Kirill	15.06.2023 - 2 hour 16.06.2023 - 6 hour 18.06.2023 - 3 hour 23.06.2023 - 4 hour 17.06.2023 - 2 hour	Application testing Writing and writing test cases Writing and making bug reports Preparing and writing PPR Discussing with colleagues
Aksana	15.06.2023 - 3 hour 16.06.2023 - 6 hour 18.06.2023 - 3 hour 17.06.2023 - 2 hour	Application testing Writing and writing test cases Writing and making bug reports Discussing with colleagues

### NEW BUGS FOUND

For the period 15.06.2023-18.06.2023 the team identified and found 23 inconsistencies and bugs in the application "Glitch Calculator", all bugs were discussed collectively and checked repeatedly.

Employee names	Errors found
Kirill	12
Aksana	11

## Graph of the number of bugs found by application testing period

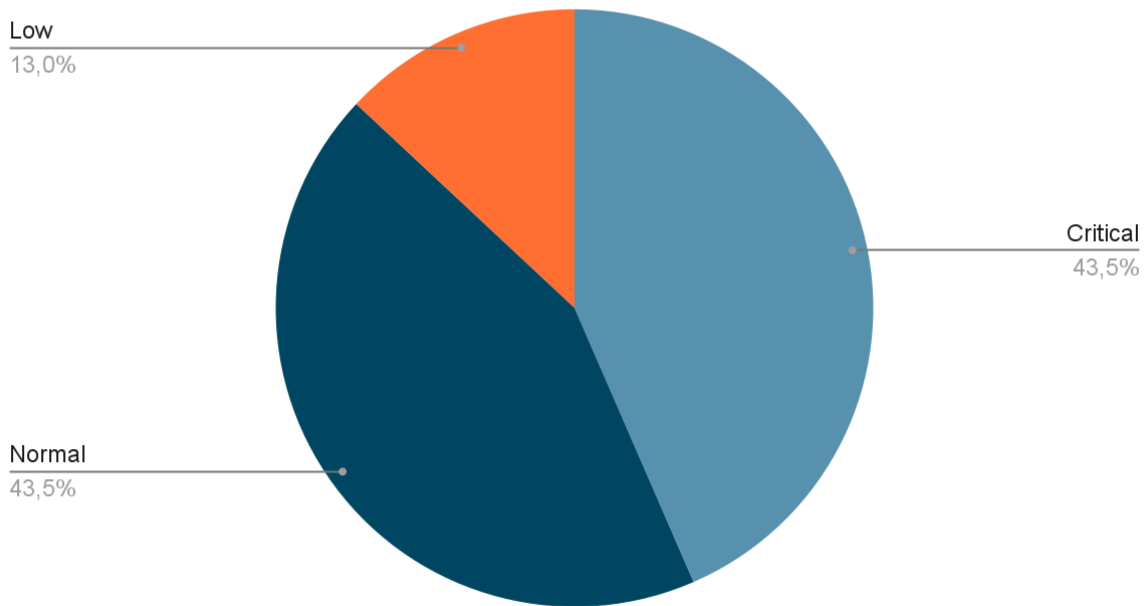

### ALL BUGS STATISTICS

ALL BUGS STATISTICS		
1	CRITICAL	10
2	NORMAL	10
3	Low	3
	ALL BUG FOUND	23

Above is a summary table with information about the bugs that the testing team had to deal with during the whole time of working with the project.

**Bug Count Chart**

## **Conclusion**

The build cannot be recommended for production deployment. The detected errors are planned to be corrected as soon as possible.
